PROJECTS

EcoCycle-System – Web-Based E-Waste Management Platform(<https://github.com/Otieno-clinton/EcoCycle-System>)

- Developed an innovative role-based Django application connecting collectors, recyclers, producers, and administrators in the recycling ecosystem.
- Implemented custom user roles, request management, and status tracking to streamline e-waste collection and processing.
- Built a modular structure with separate apps for users, collectors, and admin panel, ensuring scalability and maintainability

Skin Care App – Virtual Dermatology & Consultation Platform(<https://github.com/Otieno-clinton/SkinCareApp>)

- Designed and built a Django-based consultation system for skincare specialists and clients.
- Implemented secure authentication with role-based access (clients, specialists, admins).
- Integrated virtual consultation feature using Jitsi Meet, with waiting room, notes, and document sharing.

Web-Based Crop Recommendation System – Pwani University Final Year Project(https://github.com/Otieno-clinton/Crop_recommendation_final_project)

- Built a web application with HTML, CSS, Bootstrap, and Django, supporting smallholder farmers with data-driven crop recommendations.
- Integrated a machine learning model to analyze environmental data and provide optimized recommendations.
